February 27, 2014

Dear selection committee:

Amaury O. Rodriguez has asked me to write a recommendation letter and I do so with great pleasure. Even though Amaury is still a freshman, he has demonstrated an academic maturity of an advanced student. Last semester I taught the first programming course (Computer Programming I, CCOM 3001). Amaury was enrolled in that course and distinguished himself by receiving one of the top ten percent grades in the class. Amaury constantly strives for excellence in programming by trying to grasp and understand all the concepts we are working on. His problem solving skills are one of the leading characteristics that differentiates him.

Because all of the above, I recommend Amaury O. Rodríguez without any hesitation whatsoever. Moreover, I encourage you to select Amaury for your program.

Respectfully submitted,

Luis A. Colón-Colón,
Professor
